1 Introduction

LATG is a consulting company that provides advanced information technology-based services and solutions to a diverse spectrum of government and commercial customers.

Incorporated in 1999, LATG is a women-owned company with a commitment to providing its commercial and government clients the technical expertise necessary to gain and maintain a competitive edge in today's marketplace. This is accomplished through a dedicated staff of high caliber technology professionals.

Harnessing the power of collaboration

Whether you are working on staffing an existing contract or looking for a partnership for a win strategy on your proposal, LATG's intense focus on complete customer satisfaction remains the same.

Regardless of the market served, LATG is committed to effective, interactive communication at every stage of the project. We maintain this commitment to ensure that the final outcome provides value and top performance to the end-user, who is - after all - everyone's ultimate customer.

It is LATG's willingness to listen, combined with our ability to respond quickly, that differentiates us from our peers. That is why, increasingly, LATG is asked to team up with government and business entities to develop creative solutions to meet the demands of a changing marketplace.

Our success is securely linked to that of our customers. They trust us to deliver on our promises, and, in fact, have come to count on LATG to outperform their expectations time after time. We don't take that confidence lightly. We worked hard to earn it, and we'll work even harder to keep it.

Since its foundation, hundreds IT projects have been successfully completed with customers from the Department of Defense, Homeland Security, Department of Entergy, the State of Louisiana, Internet Providers, Stock Brokerages, Law Offices, Doctors Offices, and Restaurants.

3 Company Synopsis

LATG has (since 1999) several years of Department of Defense systems experience working with SPAWAR New Orleans, DISA, CENTCOM, and State government experience working with Louisiana State's Community and Technical Colleges (LCTCS) and universities such Louisiana State University (LSU), University of New Orleans (UNO), McNeese State University, University of Louisiana at Lafayette (ULL) and many other state agencies.

4 Corporate Experience

4.1 DOD Systems

LATG has experience in the following DOD systems: NSIPS, NSISP Analytics, TFARS, SIMS, NES, OPINS, TMIP, OASIS, EASIS, DIMHRS, SEMS

4.2 Project Management

At LATG, our project managers guide our clients through all phases of the Project Life Cycle. Whether you are looking to design a custom enterprise application, implement a business intelligence strategy, or evaluate and select a software package, we leverage our own flexible standard processes to provide tailored, client-specific processes that are mapped to the business objectives and IT needs of the project.

The following contracts are examples of our Project Management experience: NSIPS Configuration Management, NSIPS Analytics, OASIS, EASIS, various small business projects

4.3 Application Development

LATG has certified developers in JAVA, Oracle, Peoplesoft, Business Objects, Microsoft Development Suite, and Adobe/Macromedia Suite. We are ready to provide Application Development and Software Engineering management, processes and personal.

- Life Cycle Expertise: Requirements Analysis, Functional Decomposition, Physical Database Design, Process and Library Design, Application Development, Acceptance Testing, Implementation, Documentation, Monitoring..
- Peoplesoft Development, Oracle DBA, Oracle PL/SQL, C++, XML, JAVA, Business Objects
- Installing, configuring and supporting Oracle Real Application Cluster (RAC) databases.
- Application Design Lead
- Lead on Data alignment and conversion team
- Lead on Data Warehousing implementation
- Support day to day production environment and Help Desk

4.4 Database Support

As Oracle Network Partners and an Oracle Reseller, we have extensive knowledge in DBA functionalities. Our staff is providing backup and recovery, data migration, replication, performance tuning, fault tolerance and high availability services to various corporations and government agencies.

4.5 Business Intelligence – Business Objects

At LATG, we are experts in helping our clients use their data to fuel business results. Our BI solutions help you measure and enhance your business performance, understand the value in your customer base, increase the effectiveness of your programs, optimize operational decision processes and standardize key business performance metrics. We offer a range of services including: Business Intelligence Planning and Governance, Business Intelligence Applications,

Embedded Business Intelligence, Data Warehousing and Data Integration. Some clients for which we have provided these services include: The State of Georgia Department of Transportation, The United States, DOD Global Transportation Network, Lockheed Martin - NSIPS Project, Lockheed Martin- TMIP Project and United States Air Force, Transportation Command (USTRANSCOM)

4.6 Server Class Support

Our certified Sun Solaris and Microsoft engineers are helping our clients to properly choose, install and monitor the right size server and storage to meet their business need.

- Support federal UNIX systems requirements initiative as well as UNIX servers for various Department of Defense programs.
- Secured servers and workstations according to DoD security policies including IT-21 and NMCI.
- Administered Solaris and Linux systems on multiple projects.
- System auditing and system hardening.
- Level-3 Security certification from SPAWAR, and teaching the UNIX security certification course for the DoD and Contractors personnel.
- Built enterprise management system for version control. This includes hardware configuration, OS installs, patching, application installs, application upgrades, and testing.

4.7 Disaster Recovery

LATG will recommend ways to increase the effectiveness of you disaster recovery contingency and risk assessments plans and the continuity of service; a team of LATG analysts can perform quantitative risk analyses on your systems, generally including the risk analysis package as an attachment to the system security plan. We have effectively designed and implemented disaster recovery plans to the US Navy in New Orleans, Global Special Risks Corporation, Audubon Engineering Corporation among many other businesses.

4.8 Networking and Security

- Responsible for the administration of the firewall (Gauntlet), the SEMS firewall (Checkpoint NG) and numerous other systems supporting DoD initiatives.
- Supported applications that provide infrastructure (firewall, sendmail, DNS, jumpstart, web services, LDAP, PKI), as well as the Solaris systems that support Oracle and Peoplesoft.
- Built test environment for product evaluation. Working with application developers to test product under new environment, tune performance, document bugs, and develop detailed installation instructions.
- Implemented network split for Unix environment. This included coordination of system administrators, developers, and users for migration of a large number of servers and workstations to upgraded networks and servers.
- Provided a detailed design of a wide area Satellite Communications (SATCOM) network to support ship to shore transactions for PeopleSoft / Oracle distributed databases.
- Developed and delivered System Security Authorization Agreement (SSAA) documents for various government projects.

4.9 Desktop Support

- Secured servers and workstations according to DoD security policies including IT-21 and NMCI.
- IT support for over 50 small businesses in the New Orleans Area

4.10 Configuration Management

- CM Lead; Improving Code Traceability and Development Cycle by reengineering processes and properly implementing CM Tools.
- Customizing CM Tools to fit numerous development products.

-
- Track Project Document Deliverables and verify on time delivery to Customer (100% on time track record).

4.11 IT Staffing and Outsourcing

LATG provides you additional support for a week or for a year; we understand your need more than someone who simply has the technical ability to get the job done. You expect someone you can count on to take your work as seriously as you do. Understanding your business, your environment, and your needs is our business. We complete a thorough technical and background screening of the candidate to ensure the best staffing decision possible.

4.12 Placement Services

We know that hiring the right people is the key to your success. LATG is here to help join qualified candidates from our area with your company. We will free up the time you spend searching, screening, recruiting and scheduling potential candidates. LATG allows you to remain focused on your business while our placement services are hard at work finding the next ideal employee for your organization. Once your selection is made, we then complete a thorough background screening of the candidate to ensure the best hiring decision possible.

5 Partners and Contracts

5.1 Sun Microsystems iForce Partner

LATG is an authorized Sun iForceSM Partner Government, Education Systems and Professional Services Provider. The company is iForce competency certified at the premier level. LATG teams with Sun and other iForce best-of-breed partners to deliver enterprise class solutions that are easily integrated into a customer's existing environment.

We are authorized resellers for all of SUN parts, servers and storage; that includes StorageTech and Hitachi items.

5.2 Oracle Network Partner

LATG joined the Oracle Partner Network in order to offer its clients the latest technology and infrastructure with regards to professional business solutions.

LATG's commitment to specialized solutions in Business Intelligence, Database Administration and consulting services qualified it for admission into the Oracle Partner Network.

As an Oracle Partner, we have an inside track to Oracle's education, products, technical services, and marketing and sales support that will give us the tools to make our services a continued success amongst our clients. We are also authorized resellers for all of Oracle Inventory Items.

5.3 Louisiana CSSA

Louisiana Consulting and Support Services Agreement (CSSA) - Tier One Prime Contractor
LATG is Louisiana's premier prime contractor for the State of Louisiana CSSA in the following technical areas:

- Disaster Recovery
- Network Technical Support
- Desktop Technical Support
- Non-Mainframe Class Server Technical Support
