

Company Profile

LATG Inc. is a consulting company that provides advanced information technology-based Products, Services and Solutions to government and commercial customers. Incorporated in 1999, LATG is a small, women-owned, company with a commitment to providing technical expertise through a dedicated staff of high caliber technology professionals.

Contracts & Partnerships

LATG Inc. is a High Level Certified **Sun Microsystems Partner Systems and Services Provider and Reseller** for Federal, Education, Local and State government. LATG teams with Sun and other best-of-breed partners to deliver enterprise class solutions that are easily integrated into a customer's existing environment. Sun solutions decrease support and maintenance costs by reducing infrastructure complexity.

LATG Inc. joined the **Oracle Partner Network and Reseller** program in order to offer its clients the latest technology and infrastructure with regards to professional business solutions. As an Oracle Partner, we have an inside track to Oracle's education, products, technical services, and marketing and sales support that will give us the tools to make our services a continued success amongst our clients.

LATG Inc. holds **Louisiana State Name Brand contracts for SUN Microsystems and Networking**. We have a sales force and support engineers to service all state departments, colleges and Universities, school districts and local municipalities. We assist all state agencies in facility infrastructure design, capacity planning, disaster recovery, server, workstation and storage sizing, purchase and installation.

LATG Inc. was awarded a **GSA Schedule 70 GS-35F-0197U** in 2008 under category 132 51 and a **Seaport-e prime Contract**.

LATG Inc. is Prime Contractor on SPAWAR contracts and a team member on various contracts for many government departments. As a Sun/Oracle/ VMWARE Certified authorized partner, LATG brings customers the latest infrastructure and enterprise-class products and solutions that reduce datacenter headaches and complexity while integrating easily into their existing environments. And it's all backed by world-class support. Here's a sample of three solutions that we offer.

Reduce Storage Costs

Our open storage solutions combine open-source software with industry-standard system components, so that solutions are deployed for as little as one-tenth of the cost of proprietary systems. This approach helps clients:

- Integrate the latest technology easily
- Mix and match components with greater flexibility
- Implement easy-to-manage, always-on services

Increase Performance through Virtualization

Our virtualization offerings can directly help clients save money through consolidation and lower energy, facility, and labor costs. From desktop to datacenter, these highly optimized solutions allow:

- Easier and faster deployment of software
- Greater IT efficiency, agility, and flexibility

Improve Desktop Strategy

Ideal for educational and government environments which require greater flexibility, the Sun Ray virtual display client provides a compact design with flexible mounting options. Its interoperability reduces maintenance, upgrading, and operational costs. Other benefits include:

- Managing thousands of desktops with just a few administrators
- Virtually eliminating the cost of client virus attacks
- Centralizing data and applications for greater security

Services

IT Staffing, Outsourcing and Placement

LATG Inc. provides additional support for a week or for a year; we understand your need more than someone who simply has the technical ability to get the job done. You expect someone you can count on to take your work as seriously as you do. Our Account Executives possess IT backgrounds, making them uniquely skilled to find the right professionals for you. We complete a thorough background screening of our candidates to ensure the best selection decision possible.

Project Management

LATG Inc. has been successfully delivering mission-critical projects throughout all phases of the project life cycle. Our experienced project managers adhere to a standard management process that assists clients in reducing risk while ensuring original project objectives are met. Our standard management process includes:

- Project planning, estimating and tracking
- Project administration and financial reporting
- Customer, vendor and team management
- Project communication and risk management
